Short Bio

I am a PhD student in School of Business and Management (SBM) at Queen Mary University of London (QMUL). My research is broadly concerned with computational social science, and combines theories and methods from network science, sociology, machine learning, and data science. I received my MSc in Computer Science from Beihang University (China) in 2017, and my BSc in Information and Computing Science from Beihang University (China) in 2014.
